

Sweeping / eavesdropping defence (finding hidden bugging devices / cameras)

Products / Service description (Summary)

Leakage of confidential information can have severe consequences for a company. In addition to the loss of reputation, an operational disruption and financial damage, those affected may be confronted with penal issues as well as matters of private or regulatory law.

Opposing parties use illicit aids and methods to obtain information, patents and technologies, as well as personal data. The use of today's technology allows hidden sound and image recordings, which enables unauthorised persons to acquire secret or confidential data and information. In addition, a GPS tracking device can be well hidden on a vehicle to constantly record and transmit the travellers location.

We recommend to examine the technical infrastructure, premises and vehicles used by key decision makers and interlocutors in order to counteract such threats. "Sweeping" enables suspicious objects to be identified and removed from commercial buildings (from the shell to the finished state), from meeting rooms, lecture halls, offices, private houses and various means of transportation (including aircraft and vessels).

Benefits	<p>You will explicitly know:</p> <ul style="list-style-type: none"> • Whether your competition / third parties are monitoring you technically and/or electronically • Which rooms are safe for confidential meetings and discussions • What kind of information could have been leaked • Whether a selective or continuous information leak is existing • Whether your vehicle is being monitored (tracking device) or conversations tapped • What kind of countermeasures are necessary and suitable
Content	<p>Sweeping light:</p> <ul style="list-style-type: none"> • Detailed physical search of the building infrastructure and furniture, (e.g. opening of fixtures and fittings as well as disassembly / reassembly of electrical components for detailed examination of cavities and installation channels) • Creation of thermal images to identify hidden electrical devices through their heat emission • Sonic measurements to detect external eavesdropping • Documentation / reporting • Recommendation of suitable countermeasures for future defence <p>Sweeping full:</p> <ul style="list-style-type: none"> • Complete sweeping light, in addition: • X-ray of portable objects and equipment to detect permanently or temporarily installed listening devices or cameras
Methodology	Preliminary discussion and information gathering, analysis, sweeping on site, reporting.
Target group	<ul style="list-style-type: none"> • Companies and their decision makers or discussion partners • Private persons
Duration / Place	As required for inspection; depending on premises, equipment, data carriers and vehicles, etc.
Costs (excl. VAT)	According to expenditure. After an initial consultation and an inspection of the premises we'll be pleased to present you an offer.
Direction	Chris Eckert
