

## Analysis and conception of integral security (comprehensive company protection concept)

### Products / Service description (Summary)

The operability and economic power of many companies is insufficiently protected. The security of a company's key knowledge, confidential information and innovative strength must be regulated at management level. This is a matter for the principal of the firm. Do you need a comprehensive overview of the security precautions in your organization? This enables you to identify weak points in all areas of infrastructure, IT / information and ultimately where everything comes together – in your organization and its people. Finally, a comprehensive, integral security concept for your company is based on these discoveries.

In a workshop with your decision-makers, we survey the current situation in your company. We analyse the insights with our specifically developed system. Subsequently, we submit the evaluation to you with all positive, but also the delicate and risky points. At the same time, you will receive suggestions for eliminating the most pressing risks and improving the overall situation.

On this basis you have the possibility to decide on the further procedure. You can take immediate measures if necessary or get additional advice and support from us. To pave the way to integral security for your company - e.g. with a comprehensive company protection concept.

<b>Benefits</b>	Significant improvement in risk awareness and the application of defensive measures in the areas of physical, personnel and IT security, as well as a significant increase in the security maturity of the entire company. A comprehensive company protection concept and the necessary partial protection concepts are created. The protection of key knowledge, confidential information and innovation in the company is at a high level.
